WORK EXPERIENCE

IVISA - *Software Developer*

July 2021 - PRESENT

- Assisted in building and refactoring a key internal email automation tool to automatically process certain travel documents for a global user base.
- Helped maintain a Test-Driven development environment.
- Collaborated effectively with a 100% remote/global team -- including the product team, QA team, and others.

ROBERTS COMMUNICATIONS NETWORK - *Software Engineer*

March 2021 - July 2021

- Maintained, refactored, and investigated legacy code bases.
- Collaborated with business leaders to discuss business requirements and goals for current projects.
- Re-built company frontend from the ground up with React including live video streaming.
- Assisted in rebuilding backend services from on-prem legacy codebases to AWS-powered APIs.
- Assisted in maintaining and developing a low latency live streaming service.

DNA AIR CONDITIONING & HEATING - *Webmaster/Web Developer*

March 2019 - March 2021

- The role began with using Squarespace CMS to help improve the pre-existing site.
- Collaborated with business leaders to discuss website requirements and goals.
- Worked with business leaders, and other team members to select software solutions to tackle real-world business problems such as time tracking, and accounting.
- Re-built company website from the ground up into blazing fast SPA with Mailchimp, Microsoft Outlook, and other integrations.
- Built custom internal tools to fill software solution gaps.

PROJECTS

JUMPING GEOS PARTY RENTALS [view](#)

- PHP/Laravel admin dash & rental platform.
- Built a rental platform that allows users to book party rentals for a specified amount of time. Users can view available rentals in real time, and pay in segments.
- Admin Users can perform CRUD actions on items such as products, users, site settings, etc.
- Includes notifications for admin users as well as regular users.
- Utilizes Stripe API, RDS MySQL. Site is deployed to Digital Ocean.

DNA AIR CONDITIONING & HEATING WEBSITE (GATSBY) [view](#)

- React, React Bootstrap, Gatsby, Netlify CMS, Mailchimp, Cloudinary
- Completed the build out of a new website from the ground up using React along with the Gatsby framework.
- Site is integrated with Netlify CMS for non-developer content creation.
- Deployed to Netlify's CDN and using Microsoft Outlook for company email.

CHECK THIS CONTACT [view](#)

- React, Semantic UI, PHP/Laravel,
- Built a contact validation API that validates email addresses and phone numbers
- Utilizes google/libphonenumber.
- API includes a free tier with rate limiting.

- Front End has automatic deployments to Netlify, Backend has automatic deployments to Heroku.

PORTFOLIO PAGE [view](#)

- HTML5, CSS3, Bootstrap, JavaScript, Cloudinary
- Built a responsive, mobile-friendly personal portfolio page. Site is lightweight and fast.

EDUCATION

UDEMY, ONLINE

2018-present

- Self-taught responsive web development, computer science fundamentals, full-stack development.
- Courses were project-intensive, I completed numerous websites/web applications in the process.
- I continue to learn to stay up to date on the latest technologies, improve skills, and stay sharp.

BELOIT MEMORIAL HIGH SCHOOL, BELOIT WI

2012 - 2015

- Highschool Diploma
